

## 54-305 Removal and installation of rotary light switch

### Removal

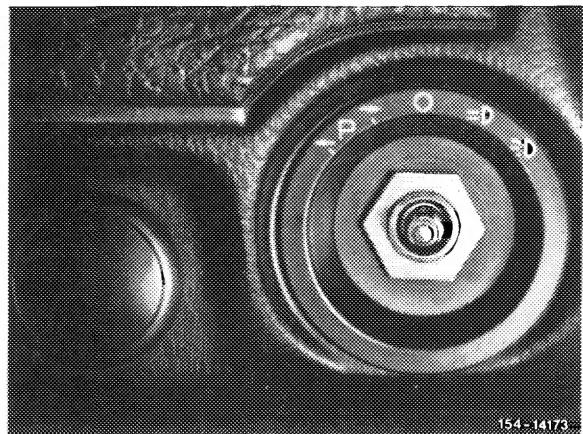

1 Disconnect battery negative terminal.

2 Pull off knob (3) (mounted conically).

3 Unscrew nut and remove cover with symbols.

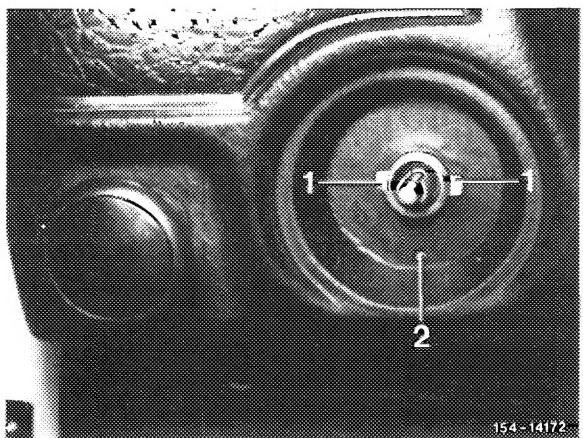

4 Remove cover under instrument panel left (68-150).

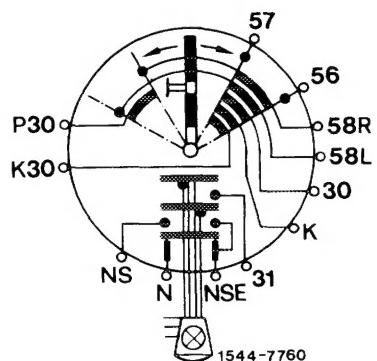

5 Remove rotary light switch from instrument panel in downward direction.

### Installation

6 For installation proceed vice versa. Make sure that rotary light switch (1) and cover (2) are engaging in recess.

**Connection diagram rotary light switch**
